OBJECTIVE

Apply programming experience and understanding of the information technology industry to become a professional programmer, bringing a lot of value to the company.

SKILL

Framework
ReactJS

NodeJS
Proficient at a basic level

CssProperty Styles
CSS, SCSS, TailwindCSS

Programing Languages
Javascript, Typescript

Redux, redux-toolkit
Proficient at a good level

UI Framework/Lib
Material UI, Ant Design

Database
Firebase, Mongo, SQL

Tools
Git, GitHub, VS Code, Visual Studio Code

English
Reading comprehension, listening at a basic level

EDUCATION

HCMC UNIVERSITY OF EDUCATION   10/2019 - NOW
INFORMATION TECHNOLOGY / SOFTWARE TECHNOLOGY
GVA: 7.1/10

EXPERIENCE

ALTA SOFTWARE   03/2023 - 05/2023
Intern Frontend - Developer

- Learning about ReactJS and combine languages Typescript into project ReactJS
- Handle data and related work task of CMS Page
- Handing connect Mongo DB into server NodeJS and create controller handle routes
- Call API from server NodeJS by Axios
- Using redux, redux-toolkit for processing data as well as asynchronous processing
- Able to work individually and with team

PROJECTS

ECOMMERCE   02/2022 - 03/2022
Frontend

- Process authentication of Firebase: login, logout, register account.
- Get API by Axios.
- Add, update, delete cart by redux redux - toolkit
- Sort products by options
- View information product such as color, quantity, comment, evaluation...

TECHNOLOGY DESCRIPTION
Firebase, yup, Formik, redux, redux-toolkit, Axios , SCSS

CMS - TICKET - SALSE   03/2023 - 04/2023
Frontend

- Handle data chart
- Sort by options such as date, usage status, check-in gate
- Add, update task CMS page
Link GitHub: https://github.com/lehai4/cMS-ticket-sale

Link web: https://c-ms-ticket-sale.vercel.app/

TECHNOLOGY DESCRIPTION

React-typescript, redux, redux-toolkit, Material UI, SCSS, TailwindCSS, react-modal, react-data-table, chart.js, firebase, moment

QUEUING - SYSTEM   04/2023 - 05/2023
Frontend - Backend

- Backend:
    • Set up server according to model MVC
    • Set up environment, schema mongo and connect toward Mongo DB
    • Create model controller for process router register, login, logout, update, delete
- Frontend:
    • Process login, logout, register, forget-password and change password account
    • Process show chart & filter data by options
    • Process add, update and details data
    • Process download file(.pdf)
    • Process change role, add role, add account, update account, update profile image
    • Process recording of user action history

Link GitHub: https://github.com/lehai4/queuing-system

TECHNOLOGY DESCRIPTION

- Backend: NodeJs, ExpressJS, JWT, MongoDB
- Frontend: react-typescript, Material, redux, redux-toolkit, chart.js, react-datepicker, Axios, firebase, formik, yup, jwt-decode, react-modal, moment, SCSS, TailwindCSS
